Cartridge Number 29

This is an exciting 'shoot-out at the O.K. Corral' Cartridge for two players involving a total of 64 different variations of games. These variations involve normal and small sized gunfighters. Gunfighters hidden on screen until a shot is fired and then they appear from their hiding places. Invisible objects for the gunfighters to hide behind. Shooting from the hip for long distances, and short distances. The ability to guide ones shots over these distances by the use of the joystick.

To start play, set up your console as detailed in the console instructions, insert the cartridge, and turn the console on. Press the reset button, then press the cycle button, until your chosen game number appears in the top left hand corner of the screen. Finally press the function button to start play.

Both hand controls have to be used, one for each player, and each player will use the number 8 button to fire his shot, the number 7 button to duck and avoid the opponents bullet. In the games where the bullet can be guided this is done by moving the joystick in a vertical movement as the bullet moves across the screen.

Players are allowed to hide behind objects on the screen, thus protecting themselves, from their opponents, but they themselves are not allowed to fire through them.

The winner is the first gunfighter to achieve 30 hits. On certain of the games there is a maximum of 10 shots at any one time, and until ones opponent has fired his 10 shots, no more shots will be allowed until then, these are called limited shot games. In the limited shot games the winner is the first gunfighter to 30 hits.

Now look at the game variations, select the game you and your opponent want to play, and good shooting!! May the best man win!!
